EXECUTIVE SUMMARY

A minimum of 300 words in length, written in 2 complete paragraphs providing an overview of the research findings for the career and job positions selected for this assignment.

This section must include some description of how technology will be used in your career as either a computing related discipline (computer science related careers) or as a computer system user (non-computer science related careers).

This section will include discussion regarding the benefits of using computers within your career discipline, how you can improve computer systems or applications, etc., for your career discipline, or how you plan to influence and improve the discipline of computing as a computer science major.

This section will also include a reference to scripture and a Biblical Christian worldview concept using that scripture, which will assist you in the ethical use of computer technology in your career.
