Assignment Details

Assignment Description

With the analysis phase of the incident response process completed the incident response team must create the report to capture its findings related to the ransomware internally generated cyber attack. This final deliverable from an investigation should be written by the expert examination investigation lead as a template only. Perform the following actions as part of this final digital forensics/incident response reporting step:

- Create a report template that could be used for this case or any future cases in which you are involved.
- Include one section for definitions.
- Develop explanations regarding the necessary qualifications for both the examiner and the report to be considered expert.
- Submit a valid Word document that contains sections and a working table of contents with updated page numbers.

Please submit your assignment.

For assistance with your assignment, please use your text, Web resources, and all course materials.
