NIMS ICS Forms Booklet FEMA 502-2 Evaluation

Institutional Affiliation:

Date:

1
The National Incident Management System (NIMS) Incident Command System (ICS) Forms Booklet, FEMA 502-2, is premeditated to help emergency responder staffs in the employment of ICS and equivalent certification all through incident operations. This pamphlet is an associate manuscript to the NIMS ICS Field Operations Guide (FOG), FEMA 502-1, which offers general direction to emergency responders on executing ICS. This form is intended to accompany current incident management platforms and does not substitute appropriate emergency operations strategies, laws, and edicts. These forms are deliberated for use inside the Incident Command System and are not aimed for utilization in multiagency organization systems or Area Command (RESPONDER, & GUIDE, 2010).

1
These forms are projected for use as devices for the formation of Incident Action Plans (IAPs), for additional incident management undertakings, and for sustenance and certification of ICS actions. Persons employing the forms ought to have a basic apprehending of NIMS, together with ICS, using training and familiarity to guarantee they can excellently use and comprehend these forms. These ICS Forms signify an all-hazards methodology and update to earlier used ICS Forms. Whereas the design and definite blocks might have been restructured, the purpose of the forms stays similar. It is acclaimed that all users acquaint themselves with the restructured forms and directives. This will play a significant role in enhancing one's Incident Command Systems (ICS) knowledge (Deal et al., 2010).

1
Also, the Incident Command System organizational charts encompassed in these forms are illustrations of the way an ICS body is usually established for an incident response. Nevertheless, the scalability and elasticity of ICS authorize adjustments, as required, founded on experience and specific incident necessities. These forms are planned to take in the vital data components for the ICS procedure they address. In that case, having access and knowledge to

use these homogenized ICS Forms is endorses the promotion of reliability in the administration and certification of occurrences in the essence of NIMS, and to enable efficient utilization of mutual support (Deal et al., 2010).
